BUILD TOGETHER

Stainless steel *excellence*

YACHTS · SUPERYACHTS · SINCE 1985

Crafting elegance, *build together.*

Stainless steel components for yachts, superyachts and luxury interiors, designed, machined and finished in Italy.

By combining artisan skill with technical know-how, we push the boundaries to offer cutting-edge solutions for the nautical sector. Precision technology is our signature.

OUR STRUCTURE

Our strength: *our people*

3000+ m²
Two production plants

70
Specialists in stainless steel processing

6
Design engineers, 6 SolidWorks licences

20+
Qualified fitters and welders

10
CNC machine tool operators

20+
Polishing specialists

2
Robotic finishing cells

ISO
9001 · 14001 · 45001 certified

OUR STORY

A family *venture*

Our story began in 1985 with our father Giuliano's dream. He was passionate about boats and the sea, about the art of forging metal and about artisan trades, and he set up a modest workshop for boat repairs and maintenance in the heart of our community.

Working side by side, our parents turned it into a business with a solid reputation for quality and attention to detail. As the demand for stainless steel components for boats grew, we specialised in static deck fittings and became one of the main specialists in the sector.

1985

Artisan workshop for small boat repairs and maintenance

1991

Metalwork shop for local industries

1994

Nautical sector: steel components and windscreens

2001

Our first numerical control machine

2019

New mechanical, automated and manual polishing department

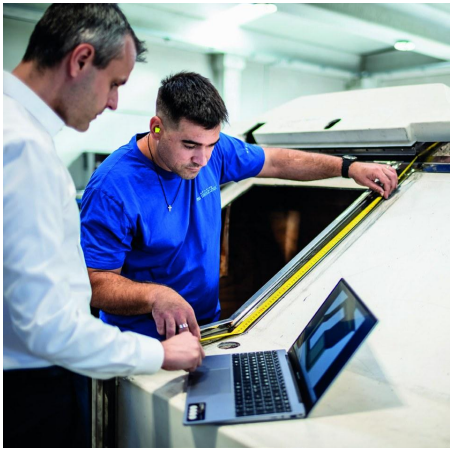

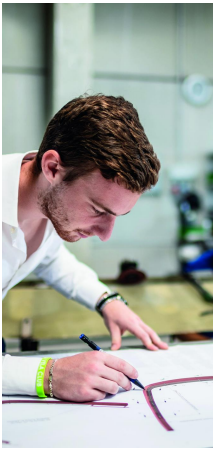

WHERE IT ALL BEGAN

From the idea *to the part*

Sleek lines, lightness, precision and robustness. Unique bespoke components are the outcome of a design approach that uses skill to turn an idea into functional reality.

Every project starts in 3D, in SolidWorks, and is followed by our engineers on the shop floor until the part is finished.

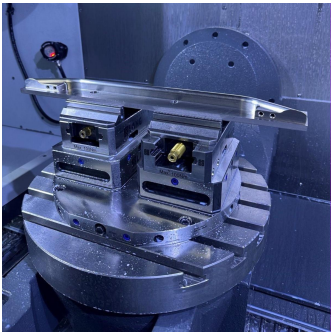

Cutting & *machining*

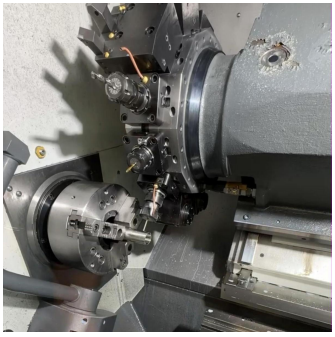

FIBER LASER 12 KW

4000 × 2000 mm bed, nitrogen cutting. Stainless steel, titanium, aluminium, carbon steel

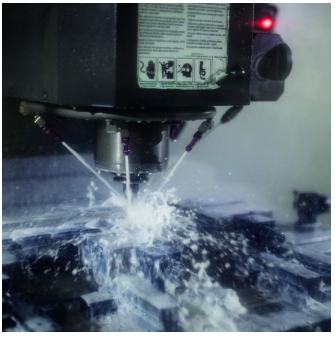

5-AXIS MILLING

Haas UMC-750, Ø 500 mm trunnion table

CNC TURNING

Haas ST-30Y with Y axis and live tooling

3-AXIS MILLING

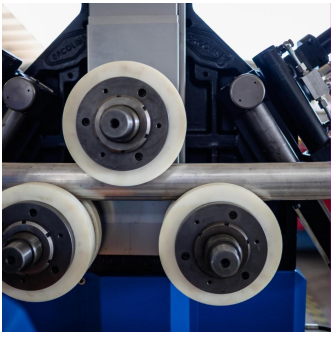

Haas VF-4SS, 1270 × 508 × 635 mm travel

Forming & *finishing*

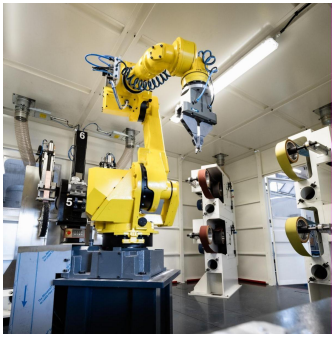

PRESS BRAKES

200 t × 4000 mm and 120 t × 3000 mm

CNC PROFILE BENDER

100 t, tubes and profiles

ROBOTIC FINISHING

Fanuc M-710iC cell, 4 belts and 4 brushes, small parts

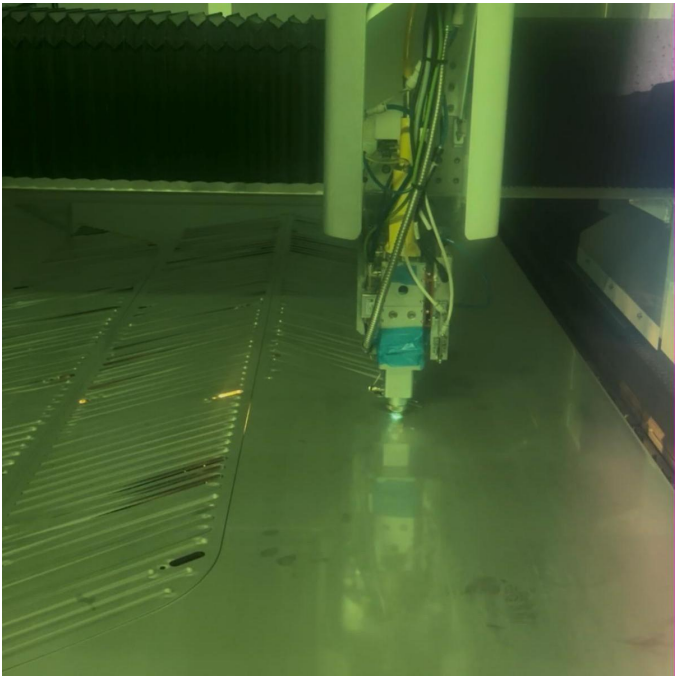

ROBOTIC FINISHING

ABB cell for large parts and long profiles

TIG WELDING · BELT FINISHING · GRINDING · LASER CUTTING

OUR PROCESS

Innovation at *the heart*

Underlying our success is our ceaseless quest for innovation. Collaboration between engineers and designers gives rise to stainless steel components that meet the highest standards, and exceed them.

Mechanical, automated and manual polishing take every part up to a mirror finish.

DIVISION

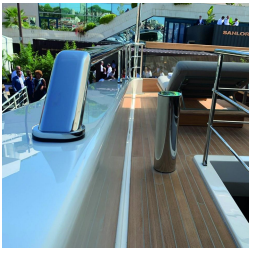

Yacht
quality without compromise

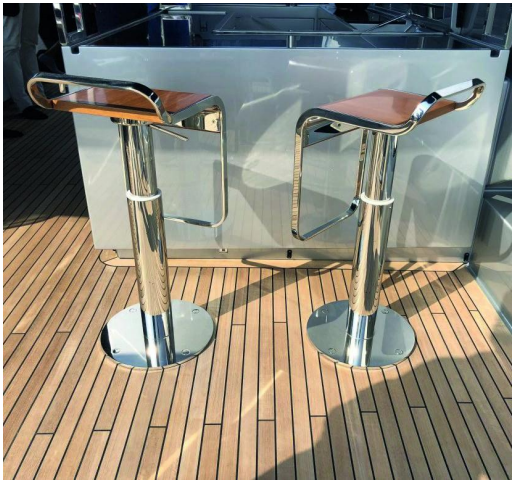

In the nautical sector, quality is everything. Our mission is to supply superior stainless steel components for yachts, designed and built to last and to offer versatile, reliable solutions.

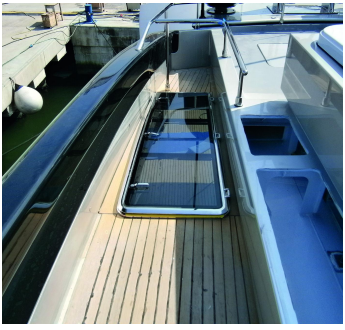

WINDSCREENS

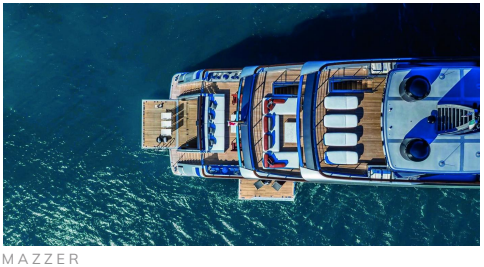

DIVISION

Superyacht
the height of luxury

On superyachts, perfection is a necessity. Every detail must be impeccable, and our commitment to excellence starts with the choice of materials.

When we are presented with a rough idea or a preliminary sketch, we use all our experience and know-how to turn it into a feasible solution that fully meets our customers' expectations.

CIAO

Sliding *doors*

Sliding, flush sliding and pantograph doors in stainless steel and glass, designed and built in house for yachts and superyachts.

Automatic doors are driven by an advanced PLC control system on the Siemens S7-1200 platform: precise, robust and modular.

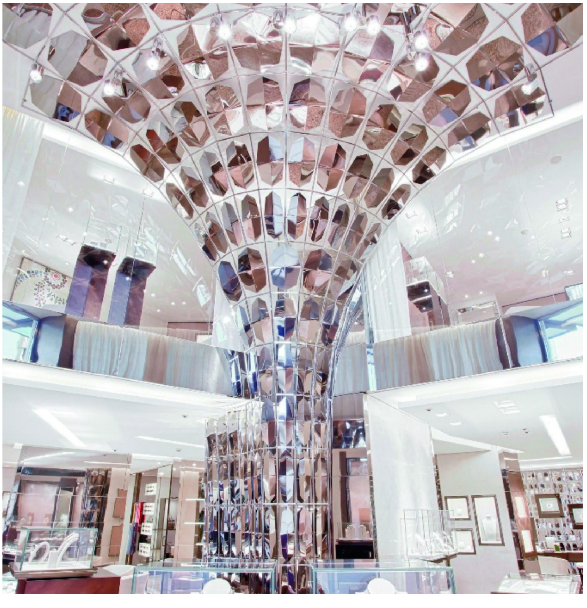

DIVISION

Luxury *furnishing*

In interior design, the beauty is in the detail. We supply stainless steel furnishings that stand out for their originality and perfection, meticulously designed and beautifully made to guarantee timeless elegance.
